### 1. Chairman's introduction

The Task Force (TF) meeting started with an introduction by the Chairman on the agenda of the meeting and the changes in composition of the Task Force. The TF members took note of the outcome of the fourth meeting. New additions to the list of relevant DLT projects in financial markets were discussed.

### 2. EU public authority initiatives

Mr. Tomas Thorsén (European Commission) updated TF members on the activities programmed by the EC in the field of DLTs and digital innovation in general. The current plan is to run a public

consultation between mid-March and mid-June, especially to seek feedback on whether current EU regulation is fit for digitalisation. The Chairman will verify via the HSG whether the AMI SeCo intends to take part in the public consultation and what contribution is expected from the DLT TF.

Ms. Anne Choné (ESMA) informed DLT members on the internal ESMA work on DLT and the recent ESMA report on DLTs applied to securities markets. The main conclusion in the report is that EU regulation does not need change to allow DLT adoption. The Chairman praised the work done by ESMA and suggested that the TF shall conduct its analysis further beyond the main EU pieces of legislation on post-trading activities, to verify whether ESMA conclusions hold – also looking at how current business models may be affected by the new technology.

### 3. Impact of DLT on Harmonisation

TF members discussed the updated version of their analyses on the potential impact of DLTs on financial markets.
