Terms and Abbreviations

The terms and abbreviations are shown in the table below. The reader can find terms with their description and the abbreviations, both in an alphabetical order.

Letter	Description			
с				
Check box Credit Debit	Square box that can be filled with a checkmark by clicking on it with the mouse. In contrast to the radio button, the user can select more than one option wi a check box.			
D				
DD	Day (e.g. used within the timestamp, every letter stands for one digit)			
d	Decimal number			
E				
e.g.	For example (Latin: 'exempli gratia')			
н				
hh	Hour (e.g. used within the timestamp, every letter stands for one digit)			
I				
i.e.	That is (Latin: 'id est')			
Incl.	Including			
Μ				
Mouse-over	Additional information for some elements of the GUI is only shown when the user moves the mouse-pointer to these elements.			
MM	Month (e.g. used within the timestamp, every letter stands for one digit)			
mm	Minute (e.g. used within the timestamp, every letter stands for one digit)			
min.	Minimum			
max.	Maximum			

Letter	Description			
10m	10 million			
N				
NRO	Non-repudiation of origin (NRO) provides the recipient (Billing GUI) with the evidence NRO which ensures that the originator (Billing actor) will not be able to deny having sent the U2A instruction. The evidence of origin is generated by the originator and held by the recipient.			
Q				
QQ	Quarter, indicates a time span of three months, e.g. Q2 stands for the second quarter of the year.			
R				
Radio button	A type of GUI element that allows the user to choose only one of a predefined set of options.			
S				
Select box Units	A select field in the GUI with an arrow on the right side. By clicking on the arrow, all possible input values are shown and can be selected with a mouse- click.			
SS	Semester, indicates a time span of six months, e.g. S1 stands for the first semester.			
SS	Second (e.g. used within the timestamp, every letter stands for one digit)			
т				
10t	10 thousand			
Timestamp	A sequence of characters, denoting the date and the time for the Billing GUI.			
Y				
YYYY	Year (e.g. used within the timestamp, every letter stands for one digit)			

1 Introduction

1.1 Overview of the User Handbook

The Billing User Handbook, hereinafter called UHB, aims at facilitating the use of the Graphical User Interface of the Billing GUI. It is intended for any Billing user regardless of the focus of activities and describes the full range of functionalities available in user-to-application (U2A) mode. The UHB provides detailed reference information on all GUI screens and step-by-step instructions for typical workflows.

Target
AudienceThere is only one handbook addressing all actors: Central Banks (CBs), Central
Securities Depositories (CSDs) and payment banks/ancillary systems. By
referring to the table of contents as well as to the usage indication list, each
reader can easily identify the relevant parts.

Related documentation The UHB is part of the functional documentation and complements the UDFS. In particular, UDFS will contain a detailed description of the business concepts used for Billing, which are also relevant when using the GUI.

Updates Updated versions of the UHB will be provided on a regular basis.

1.1.1 UHB Methodology

Several symbols and methodological elements are used throughout the Billing UHB to ease orientation and help the user to find the desired information quickly.

Page Layout Every page of the main UHB parts has a similar page layout. The user can find four different elements:

I the header, which shows the chapter and sub-chapter title

I the margin column on the left side of each page, which is used for subheadings and information signs

I the text column, which contains the main information, tables and screenshots

I the footer, which shows the name and the release of the document as well as the page number

Links Links are illustrated throughout the UHB with a little triangle followed by a page number within squared brackets. These links help the user to jump to related sections by clicking on them or turning to the relevant page.

Please find the information on page 6. [6]

Illustration 1: Link illustration

- TablesTables are used to present information in a clearly arranged format. They consist
of a table head and a table body. The body is divided into a left and a right
column. The left column contains keywords, for example field names, which are
explained in the right column. Subsections within a table are preceded by a
heading. The order of the description follows the appearance on the screen from
left to right and from top to bottom.
- Type SetRegular text in the UHB is written in Arial Unicode MS font with a size of 11pt.
Screen and button names are written in italic letters, GUI paths use the Courier
New font. Field names and field values are put in quotation marks if they appear
in a context other than their dedicated description.

Element	Format	Example
Screen name	Italic letters	Invoice Data – search/list screen
Button name	Italic letters	New button
GUI path	PC code	Common >> Parties >> Parties
Field name or value quotation	· · ·	'Opening Date' ; 'Active'

Screenshots Screenshots are used to illustrate the corresponding text. Note that there might be minor deviations between the screenshot and your screen appearance, according to your access rights or a specific selection the user has made. In addition, some functions are mutually exclusive and cannot be represented in a single screenshot. In these cases, the screenshot illustrates the more prevalent use of the screen.

Values shown on a screenshot might also deviate from the default values indicated in the description. In these cases, the description is valid rather than the screenshot.

Illustration 2: Screenshot of Invoice Data Search/List Screen

1.1.2 UHB Structure

The UHB is structured in three parts and is complemented by an annex.

Part 1The introduction explains the aim, the content and the approach of both the
UHB and the GUI. While the first section explains how to use the UHB, the
second section focuses on the design and common functionalities of the GUI.

The overview of the UHB includes information about:

- I The UHB methodology [▶]
- The UHB structure [▶]

The overview of the GUI consists of information about:

■ Setup and login procedures [▶]

■ GUI structure, including information about the menu structure, screen structure, screen types, field types and properties, and common buttons and icons [▶]

- Validation [▶]
- Communication network and services []
- User administration []
- Security and certification services [>]
- Online help [▶]

The user can refer to this part for information on how to use the UHB or on common functionalities of the GUI.

Part 2 The screen reference part starts with a general section serving as a reader's guide for this part. It is followed by the screen descriptions of all screens contained in the GUI. Each description follows an identical structure which comprises detailed information on all screen fields.

The screen reference part is structured along the first and second GUI menu level, followed by the screens in alphabetical order. Within this alphabetical

order, all screen types belonging to the same business function are grouped together to follow the business logic (*search/list* screen, *details* screen, *new/edit* screen).

The user can refer to this part for detailed and precise information on a screen, field or button.

Part 3 The user instructions part starts with a general section serving as a reader's guide for this part. It is followed by step-by-step instructions for typical GUI workflows, called business scenarios. Each description follows an identical structure.

Related business scenarios are grouped into comprehensive business packages, which are further grouped into categories.

The user can refer to this part in order to know how to carry out an action using the GUI.

Annex The **annex** supplies detailed information complementing the UHB:

■ Annex Section 4.1 - Sitemap [▶]: Hierarchical, structured illustration of all screens and their interrelations.

■ Annex Section 4.2 - List of privileges [▶]: For each screen, all privileges and their corresponding description are listed.

■ Annex Section 4.3 - List of references for error messages [▶]: For each screen, all references for error messages, the error text and the corresponding description are listed

1.2 Overview of the Graphical User Interface

The GUI is a browser-based application for communication with Billing in U2A mode. It is based on the ISO norm 9241 'Ergonomics of human system interaction'.

1.2.1 Setup and Login Procedures

Before entering the GUI, make sure that your workstation complies with the hardware and software requirements and implement all necessary preparations (e.g. firewall settings) described below.

Such requirements/preparations may be subject to periodical review/update to comply with changing technical/regulatory scenario.

Please refer to the "ESMIG U2A Qualified Configurations" annex of ESMIG UDFS.

Hardware requirements	Please refer to UDFS.	the	"ESMIG	U2A	Qualified	Configurations"	annex	of	ESMIG
Software requirements	Please refer to UDFS.	the	"ESMIG	U2A	Qualified	Configurations"	annex	of	ESMIG
Supported Web- Browsers and Settings	Please refer to UDFS.	the	"ESMIG	U2A	Qualified	Configurations"	annex	of	ESMIG

GUI Access Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter.

NRO specific requirements Please refer to the "ESMIG U2A Qualified Configurations" annex of ESMIG UDFS.

1.2.2 GUI Structure

This chapter explains the basic elements of the Billing GUI structure (i.e. structure of the menu and the screens) helping the user to navigate through the system and to use it quickly and efficiently.

The first subsection describes the menu structure where screens are grouped hierarchically. Afterwards, the second subsection explains the layout structure common to each screen. The following subsections provide details on the different screen types [\triangleright] and on recurring elements, such as common field types [\triangleright] or buttons and icons [\triangleright].

1.2.2.1 Menu Structure

The GUI menu is structured into four hierarchical menu levels. The hamburger menu appears when the proper icon is selected. Then the menu can be further navigated - the second, and third menu levels are accessible via mouse-over on the first-level menu item - in order to select the desired functionality.

Hint Depending on the access rights, it is possible that not all menu entries are selectable for the user. Contact your system administrator to verify that you have the necessary privileges to access all screens relevant to you. The privileges are listed in each screen and business scenario description.

Illustration 3: Billing GUI menu levels

Position No.	Description
1	Menu level 1
2	Menu level 2
3	Menu level 3
4	Menu level 4

All entries on the second menu level are structural subcategories. To access a screen, users have to click on the third menu level.

1.2.2.2 Screen Structure

In general, each screen of the Billing GUI follows the same layout containing a header and a content area.

The header appears at the top of every screen. It contains three main elements providing useful information and helping the user to navigate between the different screens as shown in the illustration below.

Header

Illustration 4: Header elements

Р	osition No.	Element	Description
1		Menu bar	presents the main menu item and allows you to navigate to the screens.
2		Service logo button	links to the welcome screen.
3		Information panel	displays your login name, the <i>logout</i> and <i>help</i> buttons as well as date and time of last data access.

Content Area

The content area is the part of the GUI where users can trigger all business actions. It is organised by five main elements which help the users to interact properly with the GUI as shown in the illustration below.

To structure large amounts of data, the content area is further separated into frames and sub-frames.

Service:	T2 RIGS COMPONENT	Invoice Data Status:	Active	
Parent BIC:	SYSENTT25X1	Party BIC:	NCBKICR0001	D Re
Period Start Date:	2020-02-28	Period End Date:	2022-02-28	x ca

otatus				

Illustration 5: Content area elements

Position No.	Element	Description
1	Breadcrumb	shows the main path to the current screen.
2	Frame and sub-frame title	groups related information as a structural function.
3	Button bar	shows all available buttons for the current screen.

1.2.2.3 Screen Types

The Billing GUI consists of the following types of screens, each with a different function:

- Search/List screen
- Details screen
- New/Edit screen

Search/List Screen Users can access all search/list screens on menu level fourth.

The *search/list* screen allows the users to query the Billing database using a predefined set of search criteria. After executing a search, a list of data records matching the search criteria is displayed in a table. To select an entry from a list displayed on a *search/list* or *list* screen, click on the desired entry. The background colour of the table line changes to indicate the selected entry. If the search retrieves only one record, the *details* screen is displayed directly, if users are authorised to access the *details* screen, else the record is displayed in the table in the *list* screen. Users can browse through the list using the table buttons. Furthermore, it is possible to arrange the search results in ascending or descending order by the columns shown. This does not trigger a refreshed query.

DetailsIn contrast to the search/list screen, users can only access the details screensScreenvia other screens.

All *details* screens provide users with in-depth information of a previously selected data record.

Before showing the *details* screen, a new query is forwarded to the system to ensure most up-to-date data.

Enter Screen Similar to the *details* screens, users can only access the *enter* screens through other screens.

Enter screens allow users to enter data, which can be done in two enter modes:

New mode, represented by the new screens

Edit mode, represented by the *edit* screens

In general, both modes contain the same fields. In the case of the *new* mode, all fields are blank. In the case of the *edit* mode, existing data are prefilled in the fields. Users can edit the existing currently valid value by changing the content of the field.

1.2.2.4 Field Types and Properties

0	Hint
Input Fields	In input fields, users can enter text and/or numeric content. Make sure to comply with the format requirements, which are part of each field/screen description.
Field Types	The description of the common field types with the proper descriptions follow.

Users can use the tab key on their keyboard to navigate through the GUI fields.

Select Fields

Select fields are either select boxes or check boxes.

I Select boxes: Functionally a select box is a way to enter data from a limited list of possible values. In the Billing GUI, users can find different types of select boxes, standard select box and input-sensitive select box.

I The input-sensitive select box enables the user to enter the desired value manually, which will be used to reduce the possible set of values in the input-sensitive select box list, which provides the users with a drop-down menu that shows the 10 first entries of the set of values irrespective of what users might have entered in the text field.

Party BIC:	Choose BIC	Party BIC:	NCBXIT
Period End date	NCBBHUABXXX 🛔 👩	Period End date	NCBXIT RR001
	NCBCHUAAXXX		NCBXIT RR003
	TCSOTCS0XXX		NCBXIT MMXXX
	ECMSDEFFXXX		NCBXIT DD001
	NCBAHUAAXXX		NCBXIT RR004

Illustration 6: Input-sensitive select box using the *input-sensitive select box* icon and *input-sensitive* select box with manually entered values.

I The auto-complete select box enables the user, differently from the inputsensitive select box, to make entries and choose values outside the standard set of values to be sent to the back-end for further validation (extended data scope). Due to that possibility of transporting unqualified data the validation of the values is restricted to basic checks and will be carried out mainly in the back-end. Apart from that, the auto-complete select box functions similar to the input-sensitive select box.

Parent BIC:	NCBXITRR002		
Period Start date	yyyy-mm-dd	曲	0
Service Category:	All		•

I The standard select box enables the user to choose one entry from a predefined set of values. To select an entry, click on the little box with the arrow to open the menu. Then select the desired value by clicking on it.

Status:	All
	All
Party BIC:	Created
	Sent
Billing Period From: To	Cancelled
	Payment sent

I Check boxes: Enable the user to select more than one value at the same time. Click on the boxes corresponding to the options, users would like to select. Selected check boxes contain a check mark.

Service ≡	Invoice Number 🔳	Status≡
T2S	ABCFG5000	ACTV
T2S	ABCFG5002	ACTV
T2S	ABCFG5001	ACTV

Wildcards A wildcard is a placeholder for characters and it represents any acceptable character or a set of them in a string. In the Billing GUI, users can use a wildcard in input fields in all the search screens to search for data widening the result to all the strings matching the pattern. The required number of characters is indicated in the field description. The Billing GUI accepts two possible values:

I '*' that is a placeholder for one or more characters of the input value;

Illustration 8: Standard select box

I '?' that is a placeholder for exactly one character of the input value.

Examples

BANCA D'ITALIA BANCODE ESPAÑA

DEUTSCHE BUNDESBANK

BANQUE DE FRANCE

BILL*: The result list contains all data records beginning with 'BILL'.

*Account: The result list contains all data records ending with 'Account'.

BIL?: The result list contains all data records that have any acceptable character at the end of 'BIL', e.g. 'BILL', 'BILX', etc.

The combination of the wildcard '*' is not possible, e.g 'BILL?*' or 'BIL**'

The wildcards are always usable in the fields reported before with the following restrictions:

- I It is possible that to properly search with wildcards you have to insert at least two or four characters. In this case, the minimum number of characters to be entered is reported in the field remarks;
- It is possible that a field does not allow wildcards; in this case, this is explicitly mentioned in the Remarks field.
- **Read-only** Fields In addition to enter and select fields, the Billing GUI has also read-only fields, which are pre-filled and do not allow data changes.

Field

- **Properties** All field types have specific properties with respect to possible character sets, and mandatory content.
- **Date** A Date type field has the following format: YYYY-MM-DD. There are four digits representing the year, two digits representing the month and two digits representing the day.

The default value of Date fields, unless differently specified, is BLANK.

The field Date is always linked to a calendar icon that opens a calendar where users can select a day. It is possible to insert a date writing in the field or using the calendar.

Numeric There are different type of numeric field. In general these fields, in edit mode, can contain only numbers and "-" symbol.

Field	Description	Edit mode	New mode
Numeric	Can contain only natural numbers (positive integer).	Only numbers are allowed.	The thousand separator is shown.
Integer	Can contain positive and negative integer values.	Numbers and char "-" are allowed.	The thousand separator is shown. When negative, the char "-" is shown and the string is in red.
Positive Real	Can contain positive values with decimals. When using this type, the number of decimal must be specified.	Numbers and decimal separator are allowed.	The thousand and decimal separators are shown.
Real	Can contain positive and negative values with decimals. When using this type, the number of decimal must be specified.	Numbers, decimal separator and char "-" are allowed.	The thousand and decimal separators are shown. When negative, the char "- " is shown and the string is in red.
Percentage	Can contain positive values with decimals. When using this type, a maximum of 5 digit(s) including decimal point (thereof max. 2 decimal places and decimal point) are allowed.	Numbers and decimal separator are allowed.	The thousand and decimal separators are shown plus "%" symbol.
Percentage + negative	Can contain positive and negative values with decimals. When using this type, the number of decimal must be specified.	Numbers, decimal separator and char "-" are allowed.	The thousand and decimal separators are shown plus "%" symbol. When negative, the char "-" is shown and the string is in red

Characters Billing GUI operates in British English and uses the SWIFT-x character set to enter data: if not described differently, the fields are intended to be based on the SWIFT-X character set. Billing GUI can accept the UTF-8 character set with the exception of '<', '>' and '&' in specific fields; when this happens, this is explicitly reported.

The GUI does not differentiate between upper and lower case in terms of data input for input fields.

The SWIFT-x character set corresponds with the following content:

Character	Description
a - z	26 small characters of the Latin alphabet
A - Z	26 capital characters of the Latin alphabet
0 - 9	10 numeric characters
/	Solidus (slash)
-	Hyphen
?	Question mark
:	Colon
(Opening parenthesis
)	Closing parenthesis
	Full stop
,	Comma
,	Apostrophe
+	Plus
	Space (blank)
CR	Carriage return
LF	Line feed

0

Hint

Billing GUI does not process fields (mandatory or optional), that are only filled with blanks. Blanks appearing at the beginning or at the end of a field entry are deleted automatically without any notification.

Fields in a *list* or *details* screen, where the dataset was saved without an entry, are filled with '---'.

Mandatory Content

In the GUI, mandatory fields are marked with a red line in the label. All marked fields have to be filled in before users are allowed to proceed. The red line is turned into green when the field contains a value or is selected.

Manual Correction				
Name:	1	Service Category:	21	~

Position No.	Description
1	Mandatory input field
2	Mandatory select field

1.2.2.5 Common Buttons and Icons

While working with the Billing GUI, users will find that some buttons and icons appear regularly. There are three types of common elements:

- Basic icons, which users can find on every screen
- Utility elements, which represent functions within the content area
- I Table elements, which users can find below data record lists on search/list

The buttons contained in the button bar are variable and therefore explained in the screen descriptions.

 Billing
 PDF Invoice Data
 Q Search

 ⓐ ♣
 1 2

Position No.	Element	Description
1	Export icon	exports the data of the executed query from the current screen into a csv-file. If the user applies filters in the columns of the returned list, these filters are taken into account by the export functionality.
		If exporting a list, the related search criteria are exported as well whereas detailed data are only exported, if the respective list and the details screen are covered by the same query. Otherwise just the list entry will be exported. The export icon is common to all Billing screens except for
		the welcome and the new screens. In addition to the exported data from the screen the following information is exported at the start of the file: name of the exported screen (including menu path), current date, name of the user who triggered the exporting, classification label 'RESTRICTED', timestamp of the export, defined search criteria (query parameters, if applicable), 'CHANGED DATA'

Position No.	Element	Description
		when exporting an edit screen which contains amended data that has not been submitted yet.
2	Print icon	prints the data of the current screen. It is strongly recommended to use this button for generating a clearly arranged overview of data on the printout. The print icon is common to all Billing screens except for the welcome screen.

Illustration 12: Utility Elements

Position No.	Element	Description
1	Calendar icon	opens a calendar where users can select a day. If applicable, users can also select the time via the <i>calendar</i> icon.
2	<i>Delete row</i> icon	removes the selected row in the corresponding list as well as fields or sub-frames. The <i>delete row</i> icon is only available on <i>new</i> and <i>edit</i> screens.
3	Submit changes icon	updates the selected row in the corresponding list using the values inserted in the related fields. The <i>submit changes</i> icon is only available on <i>new</i> and <i>edit</i> screens.
4	Cancel changes icon	enables the user to leave the selected and edited row without causing any changes. The <i>cancel changes</i> icon is only available on <i>new</i> and <i>edit</i> screens.

1	Sort icon	sorts the list in ascending or descending order by clicking on the up or down arrow.

2	Supplementary filter	allows in-memory filtering, depending on the type of fields, of the displayed list of items according to additional criteria as shown below.
		Data fields supplementary filter criteria:
		I Equals
		Greater than
		Less than
		Not equal
		I In range
		Text fields supplementary filter criteria:
		I Equals
		Not equal
		Starts with
		Ends with
		I Contains
		Not contains
		Predefined supplementary filter criteria:
		It contains an adaptive list of values which is consistent with the related search criterion. E.g. for any Status field, the predefined supplementary filter contains the following values: 'All', 'Active', 'Deleted'.
		When a supplementary filter criterion is used, the list is automatically filtered in memory without submitting the query to the back-end. When applied, any supplementary filter can be removed by individually resetting the corresponding filter.
		If a supplementary filter is applied, a small icon near the column header is displayed, as shown in the following image.
		Status T Active

1.2.3 Validation

In the Billing GUI, all submission processes undergo various validations, which take place in the front-end and/or in the back-end. Only correct entries, fulfilling all predefined criteria, can be further processed. To indicate the status of the recently performed action, Billing GUI uses two different types of messages to indicate a successful or failed validation as described below.

- Front-End
ValidationAs first part of the validation process, the front-end validation takes place without
communication to the back-end. The front-end validation includes both the field
validation and the cross-field validation. It is carried out after clicking on a button.
The field validation verifies that all entries comply with the required format.
The cross-field validation checks the data consistency between two or more
fields/buttons in relation to each other.
- Back-End Validation The back-end validation is the second part of the validation process. After successful front-end validation, users' request is submitted to the back-end and checked for compliance with the business validation rules. In case of failure an error message is displayed. Users can find a detailed list of all error messages and their description in the annex of the UHB (list of references for error messages [▶]).
- **Result** After each validation, the Billing GUI informs the user about the result. There are two different message types available, the **error message** and the **success message**.
- Error Message In the case of a failed front-end or back-end validation, it indicates the source of the failure, the type of error and a short hint.

Illustration 14: Error message

Success Message The success message appears as a pop-up on the upper right corner of the screen. It confirms that user's data have been submitted successfully.

Digital Signature NRO

To be defined in a next stage.

1.2.4 Communication Network and Services

Refer to the ESMIG UDFS document for details on the communication network and services.

1.2.5 User Administration

Registration Only registered users have access to the Billing GUI, therefore registration for Billing reference data and to the network is necessary prior to the first GUI access. The Registration Guide provides information on how to fill in Registration Forms properly.

After registration the system administrator is given the possibility to grant and revoke privileges to its users within the Billing GUI as described in both the screen reference part and the user instructions part.

1.2.6 Security and Certification Services

In order to guarantee a secure and safe handling of the information and to protect customer data provided via the GUI, various security elements have been put into place:

I The scope of available data and functions is controlled via the management of access rights

I The security features provided by the network providers and described in their respective user documentation prevent unauthorised access

1.2.7 Online Help

The content of the UHB can be accessed from the Billing GUI by clicking on the *help* button.

2 Screen Reference Part

2.1 General

The screen reference part offers a complete overview of all Billing GUI screens that are available in U2A mode. Each screen description focuses on a single screen and explains all fields contained therein.

In detail, every screen description has the same structure and contains the following elements.

- **Context of Usage** The context of usage explains what a screen displays, what users can do with the screen and which special features are available for the screen, for example in case of usage restrictions. If the export functionality produces more data than shown on the screen (if a *list* screen is based on a detailed query), this is also indicated in the context of usage.
- Screen
AccessThe screen access lists all possible ways to access the screen. This includes
navigation via the menu and navigation via other screens.
 - Examples

Navigation via the menu: Billing >> Invoice Data >> Invoice Data – *search/list* screen

When navigating via a *search/list* or *list* screens, a data record has to be selected by clicking on a table row. Afterwards, users can click on specific buttons in the button bar, e.g. the *details* button.

- **Privileges** The privileges segment lists all necessary privileges to access the screens and to use its functions. First, the privileges to access a screen are mentioned, followed by the privileges that are necessary to use all functions on the screen. For further information, refer to the list of privileges [▶].
- **Screenshot** Users can use the screenshot as orientation for their work with the UHB. All screenshots are based on the maximum of access rights, so deviations are possible if users do not own all privileges which are necessary to use the screen in its full extent. In addition, deviations between the screenshot and the field/button description are possible in the case of mutually exclusive functions and based on a specific selection users have made. Values shown on the screenshot might also deviate from the default values indicated in the description.

Field Description

The field description provides all the relevant information related to the respective field name. It is structured in table format with a separate table for each frame. Sub-frames are indicated by subsection headings in the table. The following illustration explains the structure of a field description.

	Invoice data - Search Criteria 2
Party BIC 1	Enter or select the Party BIC the invoice data refers to. 3
	CSD the user belongs to and it is read-only.
	Required format is: max. 11x characters. 4

Illustration 16: Example of a screen description

Position No.	Element	Description
1	Field name	indicates the respective name of each screen field.
		Mandatory fields are explicitly indicated. Input and select fields with no specific remark are always optional.
2	Frame name	indicates the respective name of each screen frame.
3	Field description	 indicates the field type and required content. Each field description starts with a keyword, which illustrates your required activity: 'Shows' indicates a read-only field [>] 'Select' indicates a select field [>] 'Enter' indicates an input field [>] 'Enter or select' indicates an input sensitive select box or an input field with suggestions [>] If there is an exhaustive list of possible values, these are listed.
4	Additional information	indicates the useful information that is for filling in the field.

Buttons

All buttons specific to the screen are listed and described in a table at the end of the screen description. The following illustration explains the structure of a button description.

Delete Row <mark>1</mark>	This function enables the user to remove the selected item from the related list. 2 If the status of the selected Manual Correction is already set to 'Deleted' this function is not available 3

Illustration 17 : Example of a button description

Position No.	Element	Description
1	Button name	indicates the respective name of each button.
2	Button description	indicates the action that is triggered when clicking on the button. Each button description starts with 'This function enables the user'
3	Cross-field validations	indicate interdependencies between a field and the button relevant for the validation of your input.

For further information on common buttons, refer to Common Buttons and Icons.

2.2 Billing

2.2.1 Invoice Data

2.2.1.1 Invoice Data – Search/List Screen

Context of
UsageThis screen enables the authorised users to display the list of created Invoice
Data and related status. The result is returned on the basis of the entered criteria
in a list and it is sorted by the values of the Service, Parent BIC, Party BIC, Period
Start date, Period End date columns in ascending order (default setting).

This screen gives also the possibility to access the details of the Invoice Data, i.e. how the total amount is divided by Service category and Service Items, and to manage the Template Corrections and Manual Corrections related to the Invoice Data.

This screen is not relevant for payment banks and ancillary systems.

The content of the list depends on the authorised user that is performing the query:

- Operators can see all Invoice Data;
- ECB users granted with 'BILL Monitor' privilege can see all Invoice Data related to a System Entity;
- CB¹ users can see the Invoice Data for their System Entity and the ones related to their community;

CSD users can see the Invoice Data for their System Entity.

Illustration 18: Invoice Data - search/list screen

¹ ECB users not granted with 'BILL Monitor' privilege are considered as CB users for their System Entity

Fields Description		Invoice data - Search Criteria
	Service	 Select the Service from the possible values: All (default value) TIPS T2 RTGS COMPONENT ECMS T2S The Service "T2 RTGS COMPONENT" is meant as T2 Service. Only for Operator User the value "All" is not allowed.
	Party to be charged Parent BIC	Enter or select the Parent BIC of the Party to be charged. Required format is: max. 11x characters.
	Party to be charged Party BIC	Enter or select the Party BIC of the Party to be charged. Required format is: max. 11x characters.
	Period Start date	Enter the date that defined the Start date of the relevant Billing Period for which the Invoice Data is searched. Required format is: Date. Only for Operator User this field is mandatory and the period identified together with "Period End date" must be at maximum three months.
	Period End date	Enter the date that defined the End date of the relevant Billing Period for which the Invoice Data is searched. This field must be greater than the Period Start date but within the same month. Required format is: Date. Only for Operator User this field is mandatory and the period identified together with "Period Start date" must be at maximum three months.
	Invoice Number	Enter the invoice number to be searched. This field is meaningful only for Invoice Data already used for the creation of an Invoice and if the latter is not cancelled. Required format is: max. 35x characters.
	Invoicee Parent BIC	Enter or select the Parent BIC of the party receiving the invoice. If the user is a CSD user, the field contains the BIC of the Operator and is read-only.

	Required format is: max. 11 characters.
Invoicee Party BIC	Enter or select the Party BIC of the party receiving the invoice.
	If the user is a CSD user, this field contains the Party BIC of the CSD the user belongs to and it is read-only.
	Required format is: max. 11 characters.

Invoice Data - List			
Service	Shows the Service of the returned Invoice Data.		
Parent BIC	Shows the Parent BIC of the Party to be charged.		
Party BIC	Shows the Party BIC of the Party to be charged.		
Period Start Date	Shows the start date of the Billing Period the Invoice Data refers to.		
Period End Date	Shows the end date of the Billing Period the Invoice Data refers to.		
Status	Shows the status of the Invoice Data (generated, corrected, included in an invoice).		
Creation date	Shows the date in which the Invoice Data has been generated.		
Service Item	Shows the Service Item of the Invoice data.		
Amount without VAT	Shows the amount in EURO of the Invoice Data without VAT. The amount format foresees five decimals.		
VAT amount	Shows the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice Data related to Participants.		
Total amount	Shows the total amount in EURO of the Invoice Data (VAT included). The amount format foresees five decimals.		
Invoice Number	Shows the Invoice Number, when the invoice exists and its status is different from 'Cancelled'.		
Invoicee Parent BIC	Shows the Parent BIC of the party receiving the invoice.		
Invoicee Party BIC	Shows the Party BIC of the party receiving the invoice.		

Buttons

Search	This function enables the user to start a search according to the entered criteria.
Reset	This function enables the user to set default search criteria and blanks out all optional criteria.
Details	This function enables the user to display the details of the selected Invoice Data.
Manual Correction	This function enables the user to enter the Manual Correction list screen of the selected Invoice Data.
Itemised Invoice Data Details	This function enables the user to display the Itemised Invoice Data of the selected Invoice Data.

2.2.1.2 Invoice Data – Details Screen

- **Context of Usage** This screen enables the authorised user to see a breakdown of the Total Amount and Amount without VAT into the specific Service Categories and Service Items. An aggregation for Service Items and applied price is shown under each service category.

Illustration 19: Invoice Data - details screen

Fields Description

	Invoice Data
Service	Shows the Service of the returned Invoice Data.
Parent BIC	Shows the Parent BIC of the Party to be charged.
Party BIC	Shows the Party BIC of the Party to be charged.
Party Short Name	Shows the Party Short Name of the Party to be charged.
Period Start Date	Shows the start date of the Billing Period the Invoice Data refers to.
Period End Date	Shows the end date of the Billing Period the Invoice Data refers to.
Status	Shows the status of the Invoice Data (generated, corrected, included in an invoice).
Creation date	Shows the date in which the Invoice Data has been generated.
Amount without VAT	Shows the amount in EURO of the Invoice Data without VAT. The amount format foresees five decimals.
VAT amount	Shows the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice data related to Participants.
Total amount	Shows the total amount in EURO of the Invoice Data (VAT included). The amount format foresees five decimals.
nvoice Number	Shows the Invoice Number, when the invoice exists and its status is different from 'Cancelled'.
nvoicee Parent BIC	Shows the Parent BIC of the party receiving the invoice.
nvoicee Party BIC	Shows the Party BIC of the party receiving the invoice.

Total number of Units and Total Amount per Service Item and unit price

Settlement Services		
Service Item	Shows the code and the Service Item name.	
Quantity	Shows the sum of the quantities of all the Invoice Data for the same Service Item.	
Price	Shows the price applied. In case of bands or tariff, each band and tariff of the Service Items is reported in one row.	

Fee Туре	Shows the type of the fee applied.
Amount	Shows the sum of the Amount in EURO calculated for all the Invoice Data in the set for the same Service Item. The amount format foresees five decimals.
VAT Rate	Shows the VAT rate considered in the computation, based on VAT defined by the System Entity for the applied Service Item. This field is shown only for Invoice Data related to Participants.
	Settlement Services sub-total
Amount without VAT	Shows the sum of all the Amounts in the category. The amount format, in EURO, foresees five decimals.
VAT amount	Shows the sum of the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice data related to Participants.
Total amount	Shows the sum of all the Amounts and VAT Amounts in the category. The amount format, in EURO, foresees five decimals.
	Account Management Services
Service Item	Shows the code and the Service Item name.
Quantity	Shows the sum of the quantities of all the Invoice Data for the same Service Item.
Price	Shows the price applied. In case of bands or tariff, each band and tariff of the Service Items is reported in one row.
Fee Туре	Shows the type of the fee applied.
Amount	Shows the sum of the Amount in EURO calculated for all the Invoice Data in the set for the same Service Item. The amount format foresees five decimals.
VAT Rate	Shows the VAT rate applied, basing on VAT defined by the System Entity for the applied Service Item. This field is shown only for Invoice data related to Participants.
	Account Management Services sub-totals
Amount without VAT	Shows the sum of all the Amounts in the category. The amount format, in EURO, foresees five decimals.

VAT amount	Shows the sum of the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice data related to Participants.		
Total amount	Shows the sum of all the Amounts and VAT Amounts in the category. The amount format, in EURO, foresees five decimals		
	Information Services		
Service Item	Shows the code and the Service Item name.		
Quantity	Shows the sum of the quantities of all the Invoice Data for the same Service Item.		
Price	Shows the price applied. In case of bands or tariff, each band and tariff of the Service Items is reported in one row.		
Fee Туре	Shows the type of the fee applied.		
Amount	Shows the sum of the Amount in EURO calculated for all the Invoice Data in the set for the same Service Item. The amount format foresees five decimals.		
VAT Rate	Shows the VAT rate applied, basing on VAT defined by the System Entity for the applied Service Item. This field is shown only for Invoice data related to Participants.		
	Information Services sub-totals		
Amount without VAT	Shows the sum of all the Amounts in the category. The amount format, in EURO, foresees five decimals.		
VAT amount	Shows the sum of the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice Data related to Participants.		
Total amount	Shows the sum of all the Amounts and VAT Amounts in the category. The amount format, in EURO, foresees five decimals.		
Bilateral Collateral Management			
Service Item	Shows the code and the Service Item name.		
Quantity	Shows the sum of the quantities of all the Invoice Data for the same Service Item.		
Price	Shows the price applied. In case of bands or tariff, each band and tariff of the Service Items is reported in one row.		
Fee Туре	Shows the type of the fee applied.		

Amount	Shows the sum of the Amount in EURO calculated for all the Invoice Data in the set for the same Service Item. The amount format foresees five decimals.
VAT Rate	Shows the VAT rate considered in the computation, based on VAT defined by the System Entity for the applied Service Item. This field is shown only for Invoice Data related to Participants.
BIC	M - Bilateral Collateral Management sub-total
Amount without VAT	Shows the sum of all the Amounts in the category. The amount format, in EURO, foresees five decimals.
VAT amount	Shows the sum of the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice data related to Participants.
Total amount	Shows the sum of all the Amounts and VAT Amounts in the category. The amount format, in EURO, foresees five decimals
	Triparty Collateral Management
Service Item	Shows the code and the Service Item name.
Quantity	Shows the sum of the quantities of all the Invoice Data for the same Service Item.
Price	Shows the price applied. In case of bands or tariff, each band and tariff of the Service Items is reported in one row.
Fee Туре	Shows the type of the fee applied.
Amount	Shows the sum of the Amount in EURO calculated for all the Invoice Data in the set for the same Service Item. The amount format foresees five decimals.
VAT Rate	Shows the VAT rate applied, basing on VAT defined by the System Entity for the applied Service Item. This field is shown only for Invoice data related to Participants.
-	Triparty Collateral Management sub-totals
Amount without VAT	Shows the sum of all the Amounts in the category. The amount format, in EURO, foresees five decimals.
VAT amount	Shows the sum of the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice data set related to Participants.

Total amount	Shows the sum of all the Amounts and VAT Amounts in the category. The amount format, in EURO, foresees five decimals.			
Other				
Service Item	Shows the code and the Service Item name.			
Quantity	Shows the sum of the quantities of all the Invoice Data for the same Service Item.			
Price	Shows the price applied. In case of bands or tariff, each band and tariff of the Service Items is reported in one row.			
Fee Туре	Shows the type of the fee applied.			
Amount	Shows the sum of the Amount in EURO calculated for all the Invoice Data in the set for the same Service Item. The amount format foresees five decimals.			
VAT Rate	Shows the VAT rate applied, basing on VAT defined by the System Entity for the applied Service Item. This field is shown only for Invoice data set related to Participants.			
	Other sub-totals			
Amount without VAT	Shows the sum of all the Amounts in the category. The amount format, in EURO, foresees five decimals.			
VAT amount	Shows the sum of the VAT amount in EURO of the Invoice Data. The amount format foresees five decimals. This field is shown only for Invoice data related to Participants.			
Total amount	Shows the sum of all the Amounts and VAT Amounts in the category. The amount format, in EURO, foresees five decimals			

Itemised Invoice Data Search	This function enables the user to search for itemised Invoice Data.
Itemised Invoice Data Details	This function enables the user to display the itemised Invoice Data of the selected Invoice Data.
Manual Correction	This function enables the user to enter the Manual Correction list screen of the selected Invoice Data.

2.2.2 Itemised Invoice Data

2.2.2.1 Itemised Invoice Data – Search/List Screen

Context of
UsageThis screen enables the authorised user to display the list of Itemised Invoice
Data that compose the Invoice Data selected in the previous screen. The
information of the selected Invoice Data is shown in the header of the screen.
Data shown in the screen are aggregated by the object the fee is charged to – a
party or an account.

As default, when executing the search, this screen shows the list of all the objects involved in the Invoice Data, i.e. the Accounts and Parties. This screen gives the additional possibility to filter by a specific object in order to obtain the subset of invoice data referred to the searched element.

The search fields are shown depending on the type of search the user wants to perform. Moreover, some search fields are visible only for the Invoice Data related to a System Entity invoice.

If the number of items for a Service Item Category is beyond a certain threshold, it is mandatory to use at least one search criteria. In this case, to activate the autocomplete feature on Account-related search criteria, a minimum number of characters (4) will be needed (the aforementioned threshold on number of items is a system parameter configurable by Operational Team via operational procedure, set by default to 10.000 items).

Illustration 20: Itemised Invoice Data - search/list screen

Fields Description		Invoice Data
Description	Service	Shows the Service of the returned Invoice Data.
	Parent BIC	Shows the Parent BIC of the Party to be charged.
	Party BIC	Shows the Party BIC of the Party to be charged.
	Party Short Name	Shows the Party Short Name of the Party to be charged.
	Period Start Date	Shows the start date of the Billing Period the Invoice Data refers to.
	Period End Date	Shows the end date of the Billing Period the Invoice Data refers to.
	Status	Shows the status of the Invoice Data (generated, corrected, cancelled, included in an invoice).
	Creation date	Shows the date in which the Invoice Data has been generated.
	Invoice Number	Shows the Invoice Number, when the invoice exists and its status is different from 'Cancelled'.

	Itemised Invoice data - Search Criteria
Securities Account number	Enter or select a Securities Account which is relevant for the Party to be charged reported in the header. This field is visible only when the Party to be charged is a CSD. Required format is: min. 4 characters (only in case of active threshold), max. 35 characters.
Cash Account number	Enter or select a Cash Account which is relevant for the Party to be charged reported in the header. This field is visible only when the Party to be charged is a CB, Payment Bank or Ancillary System. Required format is: min. 4 characters (only in case of active threshold), max. 34x characters.
Parent BIC	Enter or select a Parent BIC which is relevant for the Party to be charged reported in the header. This field is visible only when the Party to be charged is a CSD or CB. Required format is: max. 11x characters.
Party BIC	Enter or select a Party BIC which is relevant for the Party to be charged reported in the header. This field is visible only when the Party to be charged is a CSD or CB. Required format is: max. 11x characters.

Itemised Invoice Data - List			
Object Type	Shows the object type the Itemised Invoice Data refers to.		
Object Value	Shows the account number or party BIC according to the object value.		

Buttons		
	Search	This function enables the user to start a search according to the entered criteria.
	Reset	This function enables the user to set default search criteria and blanks out all optional criteria.

Details

This function enables the user to display the details of the selected itemised Invoice Data object.

2.2.2.2 Itemised Invoice Data – Details Screen

Context of Usage This screen shows in details the data calculated for an Invoice in a specific billing period. The content depends on the access point and the type of search: if it is accessed from the Invoice Data screens, it contains all the possible details; if it is accessed from the Itemised Invoice Data search screens, it contains the details depending on the type of item selected in the list.

If the number of items for a Service Item Category is beyond a certain threshold, instead of repetitive blocks, the box for that category will show a message recommending the usage of Itemised Invoice Data List Screen

(the aforementioned threshold on number of items is a system parameter configurable by Operational Team via operational procedure, set by default to 10.000 items).

In a marginal scenario, related to RTGS Ancillary System Pricing Scheme Transaction fee, the screen could show Itemised Billing Data with augmented datascope, e.g. it reports accounts outside of the datascope of the requestor.

Indeed, when a transaction charged to the Ancillary System does not involve an account owned by Ancillary System, the account owned by the counterpart of the transaction is reported as item binded to the fee. If the counterpart of the transaction is in a different system entity of the AS, this results in an augmented datascope. **{T2 CR0154}**

Itemised Invoice This function enables the user to search for Itemised Invoice Data. Data Search

2.2.3 Manual Correction

2.2.3.1 Manual Correction – Search/List screen

Context of Usage This screen enables the authorised user to display the list of Manual Corrections or Template Corrections. The result is returned on the basis of the entered criteria in a list and it is sorted by the values of the Service, Status, Parent BIC, Party BIC, Period Start date, Period End, Correction Type date columns in ascending order (default setting).

> This screen gives also the possibility to access the Invoice Data Search/List Screen. The content of the list depends on the authorised user that is performing the query:

- Operators can see all Manual Corrections and Template Corrections performed in the selected period;
- ECB users granted with 'BILL Monitor' privilege can see all Manual Corrections and Template Corrections performed to a System Entity Invoice Data;
- CB² users can see the Manual Corrections and Template Corrections for their System Entity and the ones related to their community.

Rate	Shows the percentage of correction applicable to the Amount.	
VAT Rate	Shows the applied percentage of VAT.	
VAT Amount	Shows the VAT Amount computed for the Manual Correction.	
Amount	Shows the Amount of the correction applied on the Service Item.	
Quantity	Shows the consumption related to the selected Service Item.	
Unit Price	Shows the Unit Price applied to the selected Quantity.	
Type of correction (Credit/Debit)	Shows whether the performed Manual Correction has to be debited or to be credited to the participant.	
Total Amount	Shows the total amount of the Manual Correction.	

Add Manual Correction	This function enables the user to create or edit a Manual Correction for the selected Invoice Data. If the status of the selected Invoice Data is set to "Included in
	invoice this function is not available.
Revisions	This function enables the user to display the revisions list of the selected Manual Correction.

2.2.3.3 Manual Correction – New/Edit screen

Context of
UsageThe screen "Manual Correction – New/Edit" enables the authorised user to perform
Manual Correction on Invoice Data.

Manual and Template Correction are allowed only if the relevant invoice has not been created yet, or if it has been already cancelled.

This screen is relevant for ECB, CB users and Service Operator. The user can enter new data or edit existing data. Afterwards, the user can proceed further by clicking on the buttons below.

ECB users granted with 'BILL Monitor' privilege can insert Invoice manual corrections only for System Entity Invoices (which could be propagated to Participant invoices), while the CB³ users can manually correct only the Invoice Data of their Participants.

- Screen Access
 I Billing >> Manual Correction >> Manual Correction Details screen >> Click on Add Manual Correction button
- Privileges To use this screen, the following Privileges are needed [▶]:
 I Manage Manual Correction
 I BILL Monitor (ECB Users only)

³ ECB users not granted with 'BILL Monitor' privilege are considered as CB users for their System Entity

Fields Description

Invoice Data		
Service	Shows the Service of the Invoice Data the Manual Correction is applied to. The field is read-only.	
Invoice Data Status	Shows the Status of the Invoice Data the Manual Correction is applied to. The field is read-only.	
Parent BIC	Shows the Parent BIC of the Party related to the Invoice Data the Manual Correction is applied to. The field is read-only.	
Party BIC	Shows the Party BIC of the Party related to the Invoice Data the Manual Correction is applied to. The field is read-only.	
Period Start Date	Shows the start date of the Billing Period the Invoice Data refers to. The field is read-only.	
Period End Date	Shows the end date of the Billing Period the Invoice Data refers to. The field is read-only.	

Template Correction			
Status	Shows the status of the corresponding Template Correction if present.		
Footer Text Shows the Footer text of the corresponding Template Correction present.			
Add/Delete Template Correction			
Footer Text	Enter the Footer text to be included in the PDF invoice, in substitution to the one configured in CRDM. Required format is: max 1000x characters.		

Manual Correction		
Status	Shows the status of the corresponding Manual Correction if present.	
Name	Shows the description of the Manual Correction.	
Service Category	Shows the Service Item Category.	
Service Item Code	Shows the code of the Service Item	
Rate	Shows the percentage of correction applicable to the Amount.	
VAT Rate	Shows the applied percentage of VAT.	
VAT Amount	Shows the new Computed VAT Amount.	
Amount	Shows the Amount of the correction applied on the Service Item.	
Quantity	Shows the consumption related to the selected Service Item.	
Unit Price	Shows the Unit Price applicable to the selected Quantity.	
Type of correction (Credit/Debit)	Shows whether the performed Manual Correction has to be debited or to be credited to the participant.	
Total Amount	Shows the total amount of the Manual Correction.	
	Add/Delete Manual Correction	
Name	Enter the description of the Manual Correction. This field is mandatory in create mode. Required format is: max. 35x characters. No leading and trailing space character allowed. Reference for error message [▶]: ■ DBC5003	
Service Category	Select the Service Category from the possible values: Settlement Services Account management Services Information Services Bilateral Collateral Management Triparty Collateral Management Other This field is mandatory in create mode. Reference for error message []: DBC5009 {TIPS CR0084}	

Service Item Code	Enter a new Code or select the code of the Service Item from the list of the already existing Service Item Codes. This field is mandatory in create mode. Required format is: max. 4x characters. Reference for error message [*]: DBC5001 DBC5003 DBC5009 {TIPS CR0084}
Rate	Enter the percentage of correction applicable to the Amount. This field is not allowed if an already existing Service Item Code is selected. Required format is: Percentage.
VAT Rate	Enter the percentage of VAT rate to be applied. This field is not allowed if an already existing Service Item Code is selected. Required format is: Percentage.
VAT Amount	Shows the Computed VAT Amount. This field is read only. It is equal to Amount times the VAT Rate defined for the selected Service Item if an already existing Service Item Code is selected. It is equal to Amount times the VAT Rate if a new Service Item Code is entered. Displayed format is: amount with five decimals.
Amount	Enter the Amount of the correction to be applied on the Service Item. Only one among Amount and Quantity fields must be defined. Required format is: amount with five decimals.
Quantity	Enter the consumption related to the selected Service Item. Only one among Amount and Quantity fields must be defined. Required format is: Integer. Reference for error message [1]: DBC5001
Unit Price	Enter the Unit Price applicable to the selected Quantity.

	This field is allowed only if Quantity is filled in. Required format is: amount with five decimals.
	Reference for error message []: DBC5001
Type of correction (Credit/Debit)	Select whether the performed Manual Correction has to be debited or to be credited to the participant. Possible values: Credit Debit This field is mandatory in create mode. Reference for error message [▶]: DBC5008 {TIPS CR0084}
Total Amount	 Shows the total amount of the Manual Correction. It is equal to Amount if Rate is not filled in. It is equal to the Rate percentage of Amount if both are filled in. It is blank if only Quantity is filled in. It is equal to Quantity times Unit Price if both are filled in. The field is read-only. Displayed format is: amount with two decimals.
	Propagation
Filter BIC	Enter the BIC of the party to filter the 'Parties' to be selected for Manual Correction Propagation. Required format is: max. 11x characters. This field is available only for ECB users granted with 'BILL Monitor' privilege.
Parent BIC	Shows the Parent BIC of the party (i.e. the Party BIC of the Party related to the Invoice Data). This field is available only for ECB users granted with 'BILL Monitor' privilege.
Party BIC	Shows the Party BIC of the party. Select one or more BICs to link the Manual Correction to the Invoice Data of the selected Participant.

	The list contains the Party BIC of the Participants belonging to the datascope of the party to be charged related to the Invoice Data. This field is available only for ECB users granted with 'BILL Monitor' privilege.
	Reference for error message [7]:
	DBC5006
	DBC5007
Manual Correction	Select the couple Manual Correction Name, Service Item Code from the existing Manual Corrections defined for the selected Invoice Data.
	This field is mandatory.
	This field is available only for ECB users granted with 'BILL Monitor' privilege.
	Reference for error message [>]:
	DBC5005
	I DBC5006
	DBC5007

Buttons		
	Submit Row	This function enables the user to add or update an item in the related list using the values inserted in the related fields.

	Delete Row	This function enables the user to remove the selected item from the related list.

	If the status of the selected Manual Correction is already set to 'Deleted', this function is not available.
Reset	This function enables the user to set all fields to default value and blanks out all optional fields.
Cancel	This function enables the user to cancel the process and return to the previous screen.

2.2.4 PDF Invoice

2.2.4.1 PDF Invoice– Search/List screen

Context of
UsageThis screen enables the authorised user to display the list of Invoices that have been
created for each billing period. The result is returned on the basis of the entered
criteria in a list, which is sorted by the values of the Service, Parent BIC, Party BIC,
Invoice Number, Due Date columns in ascending order (default setting).

The content of the list depends on the authorised user that is performing the query:

- Operators can see all Invoices;
- ECB users granted with 'BILL Monitor' privilege can see all the System Entity Invoices (identified by a CB or CSD Party BIC);
- CB⁴ users can see their own Invoice of the System Entity (identified by a CB Party BIC) and all the Participant Invoices (identified by Participants Party BICs) related to their community;
- CSD users can see their own Invoice of the System Entity (identified by a CSD Party BIC);
- Participants users can see their own Participant Invoices (identified by Participants Party BICs).

This screen gives also the possibility to view and download more than one PDF Invoice at the same time by means of a compressed file containing all the desired Invoices.

Screen Access	Billing >> PDF Invoice >> Search	
Privileges	To use this screen, the following Privileges are needed [):	
	BILL Monitor (ECB Users only)	

⁴ ECB users not granted with 'BILL Monitor' privilege are considered as CB users for their System Entity

	Party BIC	Enter or select the Party BIC of the Party to be charged. Required format is: max. 11 characters (SWIFT-x).	
	Billing Period From: From	Enter or pick the lower bound of the Start date of the relevant Billing Period for which the Invoice must be searched. Required format is: Date.	
	Billing Period From: To	Enter or pick the upper bound of the Start date of the relevant Billing Period for which the Invoice must be searched. It must be greater than the "Billing Period From: From". Required format is: Date.	
	Billing Period To: From	Enter or pick the lower bound of the End date of the relevant Billing Period for which the Invoice must be searched. Required format is: Date.	
	Billing Period To: To	Enter or pick the upper bound of the End date of the relevant Billing Period for which the Invoice must be searched. It must be greater than the "Billing Period To: From". Required format is: Date.	

	PDF Invoice - List
Service	Shows the Service of the returned Invoice.
Invoice Number	Shows the identification of the Invoice.
Status	Shows the Status of the returned Invoice.
PDF File Name	Shows the File Name of the PDF containing the returned Invoice.
Parent BIC	Shows the Parent BIC of the Party to be charged in the specified Billing Period.
Party BIC	Shows the Party BIC of the Party to be charged in the specified Billing Period.
Party Short Name	Shows the Short name of the Party to be charged.
Total Amount	Shows the Total Amount (VAT included) of the returned Invoice.
Amount without VAT	Shows the Total Amount (no VAT included) of the returned Invoice.
Due Date	Shows the Due Date of the returned Invoice.
Billing Period From	Shows the start date of the Billing Period.
Billing Period To	Shows the end date of the Billing Period.

Search	This function enables the user to start a search according to the criteria entered. The results are displayed in a list on the same screen.
Reset	This function enables the user to set default search criteria and blanks out all optional criteria.
Display	This button allows to display the selected Invoice in PDF format.
Download PDF	This button allows to download one or more than one PDF Invoices, after selecting them.
Confirm Invoice	This button allows to change the status of the selected Invoice from "Created" to "Sent".
	If the status of the selected Invoice is already set to "Cancelled", "Sent" or "Payment sent", this function is not available.
	Only the Service Operator can Confirm an Invoice.

Cancel Invoice	This button allows to change the status of the selected Invoice
	from "Created" or "Sent" to "Cancelled".
	If the status of the selected Invoice is already set to "Cancelled" or
	"Payment sent", this function is not available.
	Only the Service Operator can Cancel an Invoice.

2.2.5 External Consumption Data

2.2.5.1 External Consumption Data – Search/List screen

Context of Usage The External Consumption Data is consumption performed outside the Billing process.

This screen enables the authorised user to display the list of created External Consumption Data and related status. The result is returned on the basis of the entered criteria in a list and it is sorted by the values of the Service, Service Items, Parent BIC, Party BIC, Period Start date, Period End date columns in ascending order (default setting).

This screen gives also the possibility to:

- Access the details of a selected External Consumption Data
- Add new External Consumption Data
- Access the Audit trail of a selected External Consumption Data

The content of the list depends on the authorised user that is performing the query:

- Operators can see all External Consumption Data;
- ECB users granted with 'BILL Monitor' privilege can see all External Consumption Data charged to Responsible Parties;
- CB users, CSD users and ECB users not granted with 'BILL Monitor' privilege can see the External Consumption Data charged to themselves and to participants of their community;
- In the rest of the document ECB users not granted with 'BILL Monitor' will be trated as a CB user regarding data visitbility.

Illustration 27: Outbound Message - Details screen

	Outbound Message – Details screen			
Delivery Timestamp	Shows the calendar date and time when the outbound message was delivered in the related service.			
Outbound Individual Message Identification	I Shows the technical identification of the outbound individual message.			
Sender Message Reference	Shows the identification of the outbound message as assigned by the message sender.			
Outbound Queuing Status	Shows the outbound queuing status of the message.			
Network Service	Shows the name of the network service from the dropdown menu.			
Delivery Business Date	Shows the business date when the related service started the delivery of the message.			
Receiving Party Short Name	Shows the short name of the receiving party from the dropdown menu.			
Party Technical Address	Shows the technical address (i.e. distinguished name) of the receiving party.			
	Message Information			
Message Information	Shows detailed information of the request. The content of the message is only displayed in case of small messages. Bigger messages can be displayed via the separate message export icon. Pressing this icon exports the message based on the xml document. In addition, root elements are present at the beginning and the end of the exported document. On top of the export, additional information about 'Time', 'User' and 'Screen of export' is available for documentation purpose.			

3 User Instructions Part

3.1 General

The user instructions part comprises scenarios adapted from typical user workflows. They are grouped into related activities, called business packages, which are further grouped into categories.

Furthermore, the user can find business scenarios dedicated only to the Service operator highlighted by the adding 'Service operator only' in the title.

Categories

The categories are a structural element and do not contain any information.

List ofThis section contains a list of all business scenarios belonging to the businessBusinesspackage.

Scenarios The list is unordered if the business scenarios represent alternative ways to achieve the aim of the business package. It is ordered if the business scenarios have to be carried out sequentially. Sequential business scenarios do not necessarily have to be carried out directly after each other. The sequence only implies that one business scenario is a prerequisite for the following ones.

Business Scenarios

Each business scenario represents a single workflow and consists of single action steps, intermediate results and a final result. In detail, each business scenario description has the same structure and contains the following elements.

- Context of Usage The context of usage describes the aim of the business scenario and indicates whether this business scenario is mandatory or optional in order to fulfil the overall business package. It also contains the usage restrictions and the prerequisites (excluding the privileges), if available.
- **Privileges** In this section, all the necessary privileges to access and use the involved screens are listed. First, the privileges to access the first screen are mentioned, followed by the privileges necessary to proceed with the business scenario. Afterwards, the privileges for the following screens are mentioned in the same order.
- **Reference** This section lists all references to the screens involved, in order of their appearance in the business scenario.

Instructions Each workflow is described from the start to the end, beginning with the access to the starting screen. The instructions involve a number of separate steps which lead the user through a series of screens and actions. Each action step is focused on 1 single action. Intermediate results are included and the instructions end with a final result. Possible alternatives and repetitions are highlighted with a notice sign.

Example

- 1. Action step 1
- 2. Action step 2
- ⇒ Intermediate result
- 3. Action step 3
- Result

3.2 Invoice Data Query

3.2.1 Querying Invoice Data

Context of Usage	This business package describes all activities the authorised user can perform for displaying the list of created Invoice Data and their related status.		
Privileges	To carry out this business scenario, the user needs the following privilege: Invoice Data List Query		
Reference	 Further information on screens involved can be found in the screen reference part: Invoice Data – search/list screen [▶] Invoice Data – details screen [▶] 		
Instructions	 Go to the <i>Invoice Data – search/list</i> screen: Billing >> Invoice Data >> Search Billing >> Manual Correction >> Search >> Click on Invoice Data button ⇒ The <i>Invoice Data – search/list</i> is displayed. Enter all the information of interest, choosing whether to specify the 'Service', the 'Party BIC', the Start/End date of the relevant Billing period, or the Invoice Number (only if already used for the creation of an Invoice which is not cancelled).

- 3. Click on the Search button.
- ➡ The Invoice Data List is displayed.

3.2.2 Querying Itemised Invoice Data

Context of	This business package describes all activities the authorised user can perform for
ocago	displaying the list of Itemised Invoice Data that compose the Invoice Data that could be
	selected from the previous screen.

Privileges	To carry out this business scenario, the user needs the following privilege:
	Itemised Invoice Data List Query
	Itemised Invoice Data Details Query
	I Itemised Invoice Data Details Query

- Reference
 Further information on screens involved can be found in the screen reference part:

 I Itemised Invoice Data search/list screen [▶]
 - I Itemised Invoice Data details screen [▶]
- Instructions
 1. Go to the Itemised Invoice Data search/list screen:

 Billing >> Invoice Data search/list screen >> Click on the Details button >> click on the Itemised Invoice Data Search button
 - ⇒ The Itemised Invoice Data search/list is displayed.
 - 2. Enter all the information of interest, choosing whether to specify the 'Securities Account number', the 'Cash Account number', the 'Parent BIC' or the 'Party BIC'.

3.3.2 Create a New Template Correction (CB)

 Context of Usage
 This business package describes how to create a new Template Correction starting from a predefined group of Invoice Data. In the example below the CB user performs a Template Correction that leads to the substitution of the previously configured Invoice Footer in a Participant Invoice.
 Privileges
 To carry out this business scenario, the user needs the following privilege:

 Invoice Data List Query
 Manual Correction Details Query
 Manage Manual Correction

Reference Further information on screens involved can be found in the screen reference part:

- Invoice Data search/list screen [▶]
- Manual Correction details screen [▶]
- Manual Correction new/edit screen [▶]
- Instructions 1. Go to the *Invoice Data search/list* screen: Billing >> Invoice Data >> Search Billing >> Manual Correction >> Search >> Click on *Invoice Data* button
 - ⇒ The Invoice Data search/list screen is displayed.
 - 2. Enter all the information of interest, choosing whether to specify the 'Service', the 'Parent BIC', the 'Party BIC', the Start/End date of the relevant Billing period.
 - 3. Click on the Search button.
 - ⇒ The Invoice Data List is displayed.
 - 4. Select an Invoice Data and click on Manual Correction button.
 - ⇒ The Manual Correction details screen is displayed

3.3.3 Create a New Manual Correction (CB)

Context of Usage	This business package describes how to create a new Manual Correction starting from a predefined group of Invoice Data.
	In the example below the CB user performs a Manual Correction that inserts quantity and unit price of a new Service Item for a Participant Invoice.
Privileges	To carry out this business scenario, the user needs the following privilege: Invoice Data List Query Manual Correction Details Query Manage Manual Correction
Reference	Further information on screens involved can be found in the screen reference part:
	Invoice Data – search/list screen [▶]

- Manual Correction details screen [▶]
- Manual Correction new/edit screen [▶]

Instructions 1. Go to the Invoice Data – search/list screen:

- Billing >> Invoice Data >> Search
- Billing >> Manual Correction >> Search >> Click on Invoice Data button
- ⇒ The Invoice Data search/list screen is displayed.
- 2. Enter all the information of interest, choosing whether to specify the 'Service', the 'Parent BIC', the 'Party BIC', the Start/End date of the relevant Billing period.
- 3. Click on the Search button.
- ⇒ The Invoice Data List is displayed.
- 4. Select an Invoice Data and click on Manual Correction button.
- ⇒ The Manual Correction details screen is displayed

3.3.4 Create a New Manual Correction without propagation (ECB)

Context of Usage This business package describes how to create a new Manual Correction starting from a predefined group of Invoice Data.

> In the example below the ECB user granted with 'BILL Monitor' privilege performs a Manual Correction that amends the quantity of an existing Service Item in a System Entity Invoice. No propagation to Participant Invoices is performed.

Privileges To carry out this business scenario, the user needs the following privilege:

- BILL Monitor (ECB Users only)
- I Invoice Data List Query
- I Manual Correction Details Query
- Manage Manual Correction

Reference Further information on screens involved can be found in the screen reference part:

- Invoice Data search/list screen [▶]
- Manual Correction details screen [▶]
- Manual Correction new/edit screen [▶]

Instructions 1. Go to the *Invoice Data – search/list* screen: Billing >> Invoice Data >> Search

- Billing >> Manual Correction >> Search >> Click on Invoice Data button
- ⇒ The Invoice Data search/list screen is displayed.
- 2. Enter all the information of interest, choosing whether to specify the 'Service', the 'Party BIC', the Start/End date of the relevant Billing period.
- 3. Click on the Search button.
- ⇒ The Invoice Data List is displayed.
- 4. Select an Invoice Data and click on Manual Correction button.
- ⇒ The Manual Correction details screen is displayed

3.3.6 Propagation of a Manual Correction to all Participants (ECB)

Context of Usage This business package describes how to propagate a Manual Correction starting from an existing and active Manual Correction on a new Service Item already inserted in a System Entity Invoice Data.

In the example below the ECB user granted with 'BILL Monitor' privilege propagates the Manual Correction to all the Participants under the Central Bank scope.

- Privileges To carry out this business scenario, the user needs the following privilege:I BILL Monitor (ECB Users only)
 - Invoice Data List Query
 - I Manual Correction Details Query
 - I Manage Manual Correction

Reference Further information on screens involved can be found in the screen reference part:

- Invoice Data search/list screen [▶]
- Manual Correction details screen [▶]
- Manual Correction new/edit screen [▶]
- Instructions 1. Go to the *Invoice Data search/list* screen: Billing >> Invoice Data >> Search
 - Billing >> Manual Correction >> Search >> Click on Invoice Data button
 - ⇒ The Invoice Data search/list screen is displayed.
 - 2. Enter all the information of interest, choosing whether to specify the 'Service', the 'Party BIC', the Start/End date of the relevant Billing period.
 - 3. Click on the Search button.
 - ⇒ The Invoice Data List is displayed.
 - 4. Select an Invoice Data and click on Manual Correction button.
 - ⇒ The Manual Correction details screen is displayed

	Period Start date:	2024-07-13	Period End date:	2024-07-15		Reset

- 3. Click on the *Submit* button.
- The new External Consumption Data has been created and is shown in the list.

4 Annex

4.1 Sitemap

In the following sub-sections the reader may find the hierarchical, structured illustration of all the Billing screens and their interrelations.

The reader can also find below the legend which explains the meaning of each object, i.e. screen, button, dotted (blue) arrow, solid (red) arrow illustrated in the following diagrams.

Object in the diagram	Description
Data Changes Search/List screen	The object represents a screen.
	When a button is displayed on the screen, a dotted blue arrow is shown as a link between the screen and the corresponding button.
Search	The object represents a button which is shown in the relevant screen.
	After a button is pressed, the result can be displayed either on the same screen or in a different screen (e.g. the details screen).

4.2 List of Privileges

4.2.1 Reader's Guide

Reader's Guide The list of privileges is structured in accordance with the alphabetical screen order and provides detailed information on privilege code, privilege type, object type and screen criteria related to each privilege.

4.2.2 Privileges for GUI Screens

4.2.2.1 Invoice Data – Search/List screen

Privilege	Privilege Code	Screen Criteria
Invoice Data List Query	BIQ_CumulativeBillDataListQuery	n/a

4.2.2.2 Invoice Data – Details Screen

Privilege	Privilege Code	Screen Criteria
Invoice Data Details Query	BIQ_CumulativeBillDataDetailsQuery	n/a

4.2.2.3 Itemised Invoice Data – Search/List screen

Privilege	Privilege Code	Screen Criteria
Itemised Invoice Data List Query	BIQ_ItemisedBillDataListQuery	n/a

4.2.2.4 Itemised Invoice Data – Details Screen

Privilege	Privilege Code	Screen Criteria
Itemised Invoice Data Details Query	BIQ_ItemisedBillDataDetailsQuery	n/a

4.2.2.5 Manual Correction – Search/List screen

Privilege	Privilege Code	Screen Criteria
Manual Correction List query	BIQ_ManualCorrectionListQuery	n/a
Invoice Data List Query	BIQ_CumulativeBillDataListQuery	Invoice Data

4.2.2.6 Manual Correction – Details screen

Privilege	Privilege Code	Screen Criteria
Manual Correction Details Query	BIQ_ManualCorrectionDetailsQuery	Details mode
Manage Manual Correction	BIL_ManageManualCorrection	Add Manual Correction

4.2.2.7 Manual Correction – New/Edit screen

Privilege	Privilege Code	Screen Criteria
Manage Manual Correction	BIL_ManageManualCorrection	New/Edit mode

4.2.2.8 PDF Invoice- Search/List screen

Privilege	Privilege Code	Screen Criteria
BIQ_PDFInvoiceListQuery	BIQ_PDFInvoiceListQuery	n/a

4.2.2.9 External Consumption Data – Search/List screen

Privilege	Privilege Code	Screen Criteria	
External Consumption Data Details Query	BIQ_BillExtConsDataDetailsQuery	n/a	
External Consumption Data List Query	BIQ_BillExtConsDataListQuery	n/a	
Delete External Consumption Data	BIL_DeleteExternalConsumptionData	n/a

4.3 List of References for Error Messages

4.3.1 Reader's Guide

Reader's Guide This section includes a list of references for error messages for all screens. The list of references for error messages consists of a general section, which lists overall error codes that apply to all GUI screens. For all sections, these are followed by specific sections for individual screens, which are organised in alphabetical screen order and specify the respective error codes applicable for each screen. Each error code table entry includes the error text and the description.

4.3.2 References for error messages for GUI screens

4.3.2.1 Manual Correction – New/Edit screen

Reference for error message	Field or Button	Error Text	Description
DBC5001	 Submit Row Quantity Unit Price Service Item Code 	Invalid Quantity and Unit Price	In case of Manual Correction on an already existing Service Item, quantity and/or Unit Price can only be specified if their Fee Types are equal to: Fixed independent fee, Fixed fees dependent on tariff, Variable independent fee.
DBC5002	Submit Row	Manual/Template correction not allowed	Manual/Template Correction can be performed only if the relevant invoice has not been created yet, or if it has been already cancelled.
DBC5003	I Submit Row I Name I Service Item Code	Already existing Manual correction	When performing a Manual Correction create request, only Manual Corrections with different combination of name and code are allowed.
DBC5004	I Submit Row	Manual correction not allowed	Manual Correction can be performed only after the defined Correction Timeframe Date.
DBC5005	Submit Row Party BIC Manual Correction	Propagation not executed due to an error on the CB Participant //Dynamic error including Participant BIC//.	Manual Correction propagation can be performed only if the relevant invoice has not been created yet, or it has been already cancelled.

DBC5006	Submit RowParty BICManual Correction	Propagation not allowed	Manual Correction propagation can be performed only after the defined Correction Timeframe Date.
DBC5007	 Submit <u>Row</u> Party BIC Manual Correction 	Propagation not executed due to an error on the CB Participant //Dynamic error including Participant BIC//.	Manual Correction propagation can be performed only if applicable to all selected CB Participants.
DBC5008 {TIPS CR0084}	Submit Row Type of Correction	Manual correction not allowed - the invoice cannot have a negative total	When performing a Manual Correction create request with Type of correction equal to credit, the amount to be subtracted must not be greater to the invoice amount.
DBC5009 {TIPS CR0084}	Submit Row Service Category Service Item Code	Service Category already set for the Service Item Code	When performing a Manual Correction create request, for the same Service Item Code, Party and Billing Period, only Manual Corrections with same Service Category are allowed.

4.3.2.2 External Consumption Data – Search/List Screen

Reference for error message	Field or Button	Error Text	Description
DED6006	I Submit	An error occurs in External Aggregated Consumption Data deletion.	An error occurs in External Aggregated Consumption Data deletion.

4.3.2.3 External Consumption Data – Details Screen

Reference for error message	Field or Button	Error Text	Description
DED6006	I Submit	An error occurs in External Aggregated Consumption Data deletion.	An error occurs in External Aggregated Consumption Data deletion.

4.3.2.4 External Consumption Data – New Screen

Reference for error message	Field or Button	Error Text	Description
DBC6001	 Submit Service Service Item Party BIC 	Already existing External Consumption Data.	When performing a External Consumption data request, only one active instance of External Consumption Data for Service, Service Item and Participant for a specified Billig Period is allowed.
DBC6002	I Submit I Account	Account field mandatory for the selected service item category.	The Account field is mandatory if the Service Item category is ACMS or SETT.
DBC6003	SubmitParty BICAccount	Not allowed party type or account for the service item 3013	For Service Item 3013, the party to be charged must be an Ancillary System with a TIPS Party Service Link and the Account must be a TIPS ASTA under the party to be charged datascope.
DEC6006	I Submit I Account	Cash Account not found. //Dynamic error including Cash Account//	Cash Account not found.
DEC6008	I Submit I Account	Securites Account not found. //Dynamic error including Securities Account//	Securites Account not found.
